

C200

2" Remote Squeeze Off Tool

The model C200 Remote Squeeze Off Tool is designed to squeeze 1/2" to 2" PE pipe safely and effectively.

This tool is constructed almost entirely of aircraft grade aluminum alloys, allowing for a lightweight, strong and versatile tool. The jaws flat bars with radiused edges provide center springs on either side of the jaws to ensure the pipe is properly aligned every time.

The C200 incorporates a collapsible fixed handle and a detachable rotating handle for ease of storage. The tool also features a rotating gauge plate, 5/8" hex drive for use in confined spaces, and a convenient carrying handle located at the balance point.

The C200 also offers an optional grounding spike, and custom gauge plates are available upon request.

Static Electricity Grounding Spike

Standard Gauge Plate Settings

Size	SDR	Size	SDR
1/2" IPS	9.33	1" CTS	11 & 11.5
